WORK EXPERIENCE

Software Engineer Intern

2022

The Difference

- Selected to launching my career by interning in a job related to my major in Computer Science to learn the technical and soft skills needed to work as part of a team
- Working on adding functionality in Flutter framework which includes Dart, Widgets, and State Management expertise
- Collaboration with The Difference App LLC to create and launch games/apps while gaining the total experience of the process to build and launch a mobile application

Software Engineering Fellow

2022

Headstarter

- Utilizing MVC design patterns to build full-stack applications with React.JS, Node.JS, Express.JS, and AWS Lambda
- Learning the fundamental of software engineering as a fellow through the use of case studies and solving technical issues faced by Google, Capital One, & Microsoft
- Trained by engineers from Amazon, Bloomberg, and Capital One on Agile, CI/CD, Git, and microservice patterns

Software Engineer Apprentice

2022

EverUp

- Utilized HTML, CSS, JavaScript, Bootstrap, React, Firebase, Tailwind, Python, PostgreSQL, Cloud Computing to build and launch a Full-stack application
- Participated in a demanding 5-week coding bootcamp where I spent more than 100 hours learning various technologies
- Developed a portfolio and gaining hands-on experience by constructing a custom web application and database from scratch

EDUCATION

York College | Bachelor of Science

2020 - 2022

- **Major:** Computer Science **Minor:** Communication Technology
- GPA 3.2/4.0, Dean's List for senior year

Borough of Manhattan Community College | Associate of Science

2018 - 2020

- **Major:** Computer Science

SOFTWARE APPLICATIONS

Contuso | Software Development Project

2022

- Launched an Auto Part E-commerce team project where I focused on the backend and used cloud functions for integration between Firebase and the Stripe API. Utilized React and Google Provider for authentication and state management.

Nueva Temporada App | Volunteer

2020

- Created a platform to display up-to-date company media and communications. Designed and developed a Flutter based app with a minimalistic design. Enables the user to view current and previous livestreams

MovieB | Software Development Project

2018

- Collaborated with a team to build administration side and customer side of Application. Used PHP and MySQL for the backed, Bootstrap for the frontend to develop the application. Enabled the users to reserve and browse tickets online from a database
